

LETTER OF RECOMMENDATION

Being an Assistant Professor of the Information Science & Engineering, PESIT; I take this opportunity of recommending a very talented student ABHIJITH to your University.

I have taught him the courses, 'Data Communications' and 'Computing Profession and Society'. He was especially good at 'Data Communications'. I really felt so, because of his more and more interaction with me in that subject. His spirits were never dying. His way of questioning on a particular topic was very sensitive. By this I mean, His interests towards getting the knowledge of the technical details of computer were very much seen in him.

I was also in charge for his paper presentation in his final year B.E. course. He had selected 'Ant Colony Optimization', a Research topic. He really did it very well, even though it was very new and had contained advanced concepts. I was impressed at his works on gathering those research materials, arranging and putting it down on the paper. He is one of the good presenters in the class.

I really like to see my dear student ABHIJITH D.A. graduating from your esteemed university. I wish him the Best Wishes for his future studies.

Ms. Jayashree .R. 17/06/06.
